

Privacy Policy & Data Protection

Single-Use Data Processing Protocol for Software Selection & Matching

PART 1: SHORT DISCLAIMER (FORM & SUBMISSION)

Data Processing & Single-Use Policy: By submitting your data, you agree that all provided company and contact information will be processed strictly on a single-use basis for the sole purpose of matching your organization with a suitable software vendor. Immediately upon completion of this matching process, all submitted data will be permanently deleted and destroyed from our systems. No data is stored, retained, or used for secondary marketing purposes. This processing fully complies with applicable data protection legislation, including the General Data Protection Regulation (GDPR), the Dutch GDPR Execution Act (UAVG), and applicable statutory standards for corporate data protection.

PART 2: FULL PRIVACY POLICY & CORPORATE DATA POLICY

1. Introduction & Scope

This Privacy Policy governs the collection, processing, and immediate destruction of information provided through our online forms by representatives of organizations and companies ("User" or "Organization"). We are committed to the highest standards of privacy, confidentiality, and compliance with national and international legislation.

2. Purpose Limitation (Single-Use Principle)

In strict accordance with the principle of *purpose limitation*, all data submitted online—including organizational parameters, software requirements, and contact details—are collected **solely for one specific purpose**: identifying, evaluating, and connecting your organization with a qualified software vendor.

The submitted data will not be analyzed, sold, rented, reused, or processed for any secondary purpose, including but not limited to direct marketing, behavioral profiling, or data aggregation by third parties.

3. Retention Period & Mandatory Destruction

In accordance with the principle of *storage limitation*, we strictly adhere to the following policy:

- **Immediate Destruction:** Once the relevant matching results or software vendor recommendations have been delivered to the User, all submitted data is immediately and permanently removed from all active servers, databases, and temporary storage locations.
- **Zero Retention Policy:** We do not maintain archival backups or historical client databases of form submissions after the matching process is completed.

4. Legal & Regulatory Compliance

Our data processing protocols are designed to comply with all mandatory international, European, and Dutch legal frameworks for data protection and information security:

Jurisdiction / Framework	Legal Standard	Implementation & Compliance
International & EU Law	General Data Protection Regulation (GDPR) (EU) 2016/679	Strict compliance with Art. 5(1)(b) (Purpose Limitation), Art. 5(1)(c) (Data Minimization), and Art. 5(1)(e) (Storage Limitation).
Dutch Law	Dutch GDPR Execution Act (UAVG)	Full alignment with Dutch execution requirements regarding the processing of contact details.
Corporate Protection	Trade Secrets Act (WBB) / Civil Code	Application of strict confidentiality and secure processing of corporate and technical specifications prior to destruction.

5. Data Security & Confidentiality

During the brief period required to perform the software matching, appropriate technical and organizational measures are applied (including end-to-end encryption in transit and strict access controls) to protect your corporate data against unauthorized access, disclosure, or alteration.

6. Rights of Data Subjects & Organizations

Since data is destroyed immediately following the completion of the request, ongoing data subject rights (such as the right of access, rectification, or erasure under Articles 15–21 GDPR) are automatically satisfied through our protocol of immediate destruction. For inquiries, please contact our Data Protection Officer.
